

Fullstack .NET Core Developer (f/m/d)

We have an opening for an experienced .NET Core Developer to join one of our exciting ventures in the maritime/logistics space. If you have deep technical knowledge and you are able to thrive in a fast paced environment - then we have the perfect job for you.

Duties and Responsibilities:

- Design and implement new features in collaboration with the product and tech team,
- Taking end-to-end ownership for your products and features,
- Work as a team to ensure the quality and maintainability of the code,
- Monitor carefully the performance and errors in order to guarantee a unique experience for our users,
- Determine strategies to integrate new technologies into our product architecture and design,
- Transform an early-stage project into a full-fledged growth business.

Benefits:

- Immediately take on responsibility and work closely with the companies management team,
- State-of-the-art development environments and tools to efficiently produce high-quality code,
- Join a highly qualified team and shape the future of the organization,
- Play an important role in the disruption of an established industry,

Requirements and Qualifications:

- Self-motivated and you strive to find pragmatic, incremental paths to success, even when faced with big challenges
- 3+ years of experience developing in .NET Core,
- Highly confident in SQL or PostgreSQL data storage,
- Strong JavaScript and AngularJS proficiency - you identify as a full-stack engineer,
- Code quality, continuous integration and scalability mean something to you,
- Fluent in English or German
- Willingness master any potential technology, languages, or development environment.

To Apply:

- Send your application documents to loebner@tecpier.com
- Include your CV and other information you deem helpful (short and simple)
- Please mention your earliest availability for the position.
