

Linux Software Developer

wtec develops trendsetting products that bring sustainability to the forefront of building technology. Our engineering team based in the regions of Frankfurt/Rhein-Main and the heart of Silicon Valley have developed cutting edge, innovative solution that combines IOT sensors with LED lighting control to deliver true building intelligence. Our solutions have been deployed all around the world by leading global enterprises focused on energy savings and smarter buildings.

We are looking to hire dynamic software development engineers with strong background in linux to work on features on our embedded platforms using C++. You must be self-driven, and have a strong desire to learn. You are expected to have excellent English and German conversational skills, coupled with a friendly, collaborative attitude. We're a small team working on big things. We work together as a company, with our software, hardware, service and commercial teams on first name basis and involved with each other's tasks and needs. Please come prepared to be successful and have fun while doing it.

Minimum Qualifications:

- Strong OO software design knowledge — asynchronous event driven patterns, publish-subscribe patterns
- Strong knowledge of Linux systems and internals
- Strong knowledge of programming in C++ — experience with boost libraries is a plus
- Bachelor's Degree in Electrical Engineering, Computer Engineering, Computer Science or related field
- Must be a strong team player with the ability to work with a local team and a remote team in California
- Must be self-driven and be able to work with minimal supervision

Preferred Qualifications:

- Experience with Embedded Development
- Current with the latest technology trends and may be considered as an early adopter
- Familiarity with wireless technologies (e.g BLE, enOcean, etc.)
- Experience with messaging protocols, e.g., HTTP, MQTT, etc.
- Experience with networking protocols, e.g. IPv4/IPv6
- Master's Degree in Electrical Engineering, Computer Engineering, Computer Science or related field
